PERSONAL PROFILE

Data Engineer with a strong background in backend development and DevOps, specialized in building and operating scalable data platforms on Azure and Databricks. Experienced in designing and maintaining end-to-end ETL/ELT pipelines handling large-scale data volumes, with a strong business-oriented mindset and excellent communication skills for cross-functional environments.

EXPERIENCE

PROEDUCA

Feb. 2025 – Present

Data Engineer

Madrid, Spain

- Developed, maintained and monitored cloud-based data infrastructure across **Azure and GCP**, supporting the full data ecosystem of the organization.
- Designed and operated **ETL/ELT pipelines processing over 100 TB of data** across **2,000+ tables**, integrating heterogeneous sources (SQL Server, MySQL, external APIs).
- Implemented data architectures following **Data Vault** and **Medallion Architecture** principles (Bronze, Silver, Gold).
- Built and orchestrated pipelines using **Azure Data Factory, Databricks and PySpark**, with daily and high-frequency loads.
- Managed incremental ingestion into ADLS using AVRO files and curated data into **Delta Lake external tables**.

Que Hacer Hoy S.R.L.

Aug. 2024 – Feb. 2025

Backend Developer

Santo Domingo, Dominican Republic (Remote)

- Developed backend services for a real-time, geolocated events platform (web and mobile).
- Designed and implemented a **NoSQL data model** using Firebase to persist user and event data.
- Built backend components in **Java and Kotlin** with Spring, and collaborated on a Flutter-based mobile app.
- Participated end-to-end in the product launch cycle, from design to production release.

Ingrid Gem S.L.

Mar. 2023 – Dec. 2023

Developer

Madrid, Spain

- Developed and maintained a management software for urban infrastructure and public asset inventory.
- Implemented custom JavaScript queries against **MongoDB** to meet client-specific reporting needs.
- Contributed to product documentation, maintenance and technical support processes.

EDUCATION

DevOps Bootcamp

Sept. 2025 – Feb. 2026

Universidad Internacional de La Rioja (UNIR)

Spain

- Cloud infrastructure on AWS, virtual machines and automation.
- Final Project: Designed and implemented a complete **CI/CD infrastructure from scratch**.

Backend Development Bootcamp

Mar. 2024 – Jul. 2024

Universidad Internacional de La Rioja (UNIR)

Spain

- API development and secure integration with databases.
- Final Project: Backend application with **hexagonal architecture** exposing multiple endpoints.

Master in Python and Data Science

Oct. 2023 – Apr. 2024

Universidad Internacional de Valencia (VIU)

Spain

- Data structures, data analysis and predictive modeling.
- Final Project: Predictive model built in Jupyter using Pandas, NumPy, Scikit-learn and TensorFlow.

SKILLS

Languages: Python (Strong), Java (Strong), SQL (Strong)

Data Engineering: ETL/ELT (Strong), Data Modeling (Intermediate), Data Quality (Intermediate)

Cloud Platforms: Azure (Strong), GCP (Intermediate), AWS (Basic)

Tools: Azure Data Factory, Databricks, PySpark, Delta Lake, Git, CI/CD
